

Biodiversity Research Consortium Brazil–Norway (BRC)

BRC Call 01/2025 – Preliminary Results (Correction)

The Brazil–Norway Biodiversity Research Consortium (BRC), through its Executive Secretariat, hereby **announces the final results of the proposal selection process under BRC Call 01/2025**.

The evaluations were conducted by a Scientific Committee composed of invited researchers external to the BRC, ensuring impartiality, transparency, and scientific rigor throughout the selection process.

Table 1 presents the four selected proposals, organized in alphabetical order.

Congratulations to all successful applicants!

Table 1. Approved proposals.

Proposing Institution	Proposal Title
Universidade Federal Rural da Amazônia – UFRA	Artificial intelligence and cutting-edge hardware technologies for water treatment and aquatic food webs monitoring in the Hydro Bauxite Mine Area in Paragominas, Brazil
University of Oslo - UiO	Ecosystem Guardians (ÉGUA): protistan parasites as indicators of ecosystem health
Museu Paraense Emílio Goeldi - MPEG	Genes, morphology, function, and AI: a new integrative approach to the evaluation of ecological recovery based on overlooked invertebrates in Amazonian post-mining ecosystems
Universidade Federal do Pará - UFPA	Integrating Technology and Conservation for the Recovery of Amazonian Streams Degraded by Mining Activities – ReStreAm
